PROFILE

An Information Technology graduate from Yogyakarta State University with a 3.75 GPA. Skilled in machine learning, data analysis, and full-stack software development also experienced working on various projects involving the development of machine learning models, data analysis, and the creation of web and mobile-based applications. Active in national competitions with a consistent track record of achievements, and has completed over 35 training certifications from national and international institutions.

EDUCATION

Yogyakarta State University (UNY) | S1 Information Technology

(2022 – 2026) • Yogyakarta, Indonesia

- GPA: 3,75 / 4,00
- Study focus: Artificial Intellegence, Machine Learning, Data Analytics, Software and Web Development

EXPERIENCES

UKM Rekayasa Teknologi – Yogyakarta State University | Information and Technology Division

(2022 – 2023) • Yogyakarta, DI Yogyakarta

- Active role as a member of the hacker division, focusing on training and developing coding skills for organization members.
- Contributed to organizing basic to intermediate programming training sessions for new students.
- Developed problem-solving skills and teamwork within the campus tech community.

Bangkit Academy – Dicoding Indonesia | Machine Learning Cohort

(2024) • Remote

- Participated in the Bangkit Academy Certified Internship and Independent Study (MSIB) program organized by Google, Traveloka, and GoTo.
- Focused on the Machine Learning track: intensively studied ML algorithms, deep learning, computer vision, and NLP.
- Complete a machine learning-based capstone project as the program's final assignment.
- Collaborate in cross-disciplinary teams (ML, Android, Cloud) to develop technology-based solutions.

Samsung Innovation Campus – Hacktiv8 | AI & IoT Participant

(2024 – 2025) • Remote

- Participated in the Samsung Innovation Campus intensive training program, focusing on the development of Artificial Intelligence (AI) and the Internet of Things (IoT).
- Studied the integration of AI systems with IoT hardware to develop smart technology solutions.
- Made it to the finals (Top 20) in the program's national-level competition.

Internship – PT Dirgantara Indonesia (Persero) | Planning & Business Process Management

(2025) • Bandung, West Java

- Developed an internal company dashboard project for monitoring and visualizing data related to planning management and business processes.
- Contributed to system requirements analysis, interface design, and the implementation of a web-based dashboard.
- Collaborated directly with internal teams to ensure that the developed solutions met the company's operational needs.

ACHIEVMENT & AWARDS

Yogyakarta State University Outstanding Student of 2026 in the Field of Reasoning – UNY *(2026)*
Awards presented by the Rector to outstanding students in 2026, held at Yogyakarta State University on National Education Day.

2nd Place Software Development Unity Competition – UNY *(2026)*
Developed "EduDetect" a web-based smart classroom application that leverages Deep Learning and Computer Vision to detect and classify students learning focus using CCTV integration for real-time classroom monitoring.

1st Place National Essay Competition SAGA – UNNES *(2025)*
Authored an award-winning scientific paper proposing "EduDetect", an IoT and AI-based smart classroom monitoring system designed to enhance learning effectiveness through intelligent classroom analytics.

1st Place Software Development Unity Competition – UNY *(2025)*
Developed "NUNA" a mobile application for mental health monitoring and self-care featuring emotion tracking, an AI-powered chatbot, and personalized coping strategy recommendations.

2nd Place Software Development IDTC – ITENAS *(2025)*
Developed "NutriDetect" an AI-powered mobile application for nutrition, calorie, and dietary monitoring, integrating food analysis with an intelligent chatbot to promote healthier lifestyle decisions.

Finalist Pekan Ilmiah Andalas – Universitas Andalas *(2025)*
Selected as a national finalist in a scientific innovation competition, presenting an innovative research solution addressing real-world challenges through technology and interdisciplinary approaches.

Finalist Samsung Innovation Campus – Hacktiv8 *(2025)*
Ranked among the Top 20 finalists for designing and developing an IoT and AI-based smart classroom monitoring system, demonstrating innovation in intelligent education technology and embedded systems.

CERTIFICATION & TRAINING

- **BNSP Certificate of Competence Junior Data Analyst** – Lembaga Sertifikasi Profesi Sertifa *(2026)*
  Demonstrated competency in the end-to-end data analytics process, including data collection, data preparation and cleaning, object identification, SQL-based data querying, and data utilization to support analytical and business decision-making.
- **BNSP Certificate of Competence Junior Network Administrator** – Lembaga Sertifikasi Profesi Teknologi Digital *(2025)*
  Demonstrated competency in designing, configuring, and administering enterprise network infrastructure, including IP subnetting, routing, LAN/WAN implementation, wireless hotspot deployment, server integration, and end-to-end network connectivity simulation.
- **Machine Learning Specialization** – DeepLearning.AI & Stanford University *(2024)*
  Completed a comprehensive specialization covering supervised and unsupervised machine learning, deep learning fundamentals with TensorFlow, convolutional neural networks (CNN), natural language processing (NLP), and sequence and time-series modeling for real-world AI applications.

And has completed more than 35 other training certifications from various national and international institutions.

HARD SKILLS

Artificial Intelligence (AI) | Business Analysis | Business Strategy | Computer Vision | Data Analysis | Data Entry | Data Visualization | Full-stack Web Development | Machine Learning | Project Management | Python | UI/UX Design

SOFT SKILLS

Adaptability | Collaboration | Decision Making | Problem Solving | Time Management

LANGUAGE SKILLS

- Bahasa Indonesia (Native)
- English (Active)
